## A diverse range

To Meet Your Workplace Needs

All Hedgehog® brushes comply with the following food safety standards

The Global Food Safety Initiative (GFSI) approved BRC, FSSC22000, IFS and SQF food standards. All these standards list colour-coding as a requirement to prevent cross-contact and cross-contamination and to improve food safety.

Extendible Handle

## LEGENDS

## Brushes And Brooms

The Hedgehog® range offers a wide range of hygienic brushes and brooms. They come in various shapes and sizes for use in multiple applications. All bristles are made from PBT. They are non-absorbent, wear resistant, acid and alkali resistant with good elasticity, which makes Hedgehog® Hygiene Products highly effective and durable.

Our range of product includes Antifur® Resin-Set Brushes and Brooms - specially designed for use in the food and beverage industry, and in applications where they come into contact with food. This shed-free feature helps to ensure that the bristles will not appear in the food or beverage.

There are a range of bristle flexibility options available. Brushes and brooms with stiff bristles are designed for scrubbing. They are ideal for removing stubborn dirt. Brushes and brooms with soft bristles are ideal for sweeping powders and other small and lightweight particles. The bristles are orientated to maximise cleaning effectiveness for the jobs they've been designed for.

All Hedgehog® Hygiene Brushes and brooms were designed with ergonomics in mind. They are comfortable to handle and use. This also helps to prevent occupational injuries caused by long-term use of the brushes.

# Antifur® Resin-Set Brushes

## Round Scrub Brush

01 02 03 04 05

CODE						
12233	110 x 110 x 105	PBT	40	0.6	134	6

# Duoswee® Floor Squeegees

There are various products in the Hedgehog® Duoswee® Floor Squeegee range to suit different uses. There are also multiple sizes to choose from, to meet a variety of needs. Integrated monolithic TPE floor squeegees are suitable for cleaning areas with high hygiene requirements. They effectively remove any liquid, semi-solid or loose, dry substance from surfaces.

The replaceable double rubber floor squeegees are easy to disassemble for cleaning and maintenance. There are two materials available for squeegee refills. The squeegee refills, made from rubber or TPE. Both of the ranges can be used to efficiently remove surface liquid and semi-solids. Both the rubber and TPE squeegee ranges include fixed and swivel squeegees.

The Hedgehog® Duoswee® Floor Squeegee range is colour-coded. Different coloured floor squeegees are available for cleaning different areas to minimise the risk of cross-contamination.
